

## 4th ANSA & $\mu$ ETA International Conference retrospective

June 6, 2011

**BETA CAE Systems S.A. delivers a retrospective of its recent international event.**

From June 1<sup>st</sup> to June 3<sup>rd</sup> 2011, the focal point of the CAE world shifted to the 4<sup>th</sup> ANSA &  $\mu$ ETA International Conference, organized by BETA CAE Systems S.A. at the Makedonia Palace hotel, in Thessaloniki, Greece.

For three days this event was the stage where CAE (Computer Aided Engineering) experts from around the world showcased their success stories using the software products of BETA CAE Systems SA. The event demonstrated how state-of-the-art engineering progresses, with vision and determination, with more efficient product development tools and methodologies.

More than 120 guests from 64 companies, coming from 18 different countries, joined the engineering personnel of BETA to share their work, pass their experience, exchange their thoughts and promote their requirements.

An extensive programme of contributed presentations was formed, focused on numerous disciplines and industrial sectors. Grouped according to subject relevance, these presentations kept the attention of the audience unabated.

About 35 contributed presentations composed the main body of the event, in plenary or parallel sessions. Beyond those, a number of presentations that was not made possible to be given have been added to the conference proceedings. The programme also included presentations on the latest developments on ANSA &  $\mu$ ETA, highlights of the future developments and an introduction to the new product of BETA CAE Systems, the SPDRM.

The showroom that was set up next to the conference rooms, organized in different applications areas, gave a unique opportunity to the participants to interact with BETA's engineers from the development and services departments, to promote their requests and to share their problems. This communication added significant value to the participation experience.

As happened in our previous two events, the interaction among the participants remained intense during the offered meals and specially during the social event themed as "Greek night".

BETA CAE Systems S.A. thanks all and congratulates the participants for their contribution to the success of the event. We are looking forward to hosting you again during one of our following events.
