

PRESS RELEASE

IMMEDIATE RELEASE

Successful results of the technological partnership between Siemens PLM Software and BETA CAE Systems SA

Thessaloniki, Greece, July 10, 2008

BETA CAE Systems S.A. is proud to announce that in close cooperation with its technology partner Siemens PLM Software is able to deliver to the Industry highly efficient solutions for interfacing Teamcenter® software and ANSA CAE pre-processor, scaling up the benefits of simulation data management.

Since February, 2008, BETA CAE Systems S.A. is a Software and Technology Partner of Siemens PLM Software, a business unit of the Siemens Industry Automation Division and a leading global provider of product lifecycle management (PLM) software and services. This partnership was an enabler that leveraged the development and deployment of an interface between ANSA and the Simulation Process Management module of Teamcenter, the world's most widely used PLM portfolio. The interface between Siemens PLM Software's Teamcenter and ANSA CAE pre-processor of BETA CAE Systems SA, tailored to customers' requirements, allows the effective engineering data sharing between the two applications that are well established in two different domains, PLM and CAE. This integration leads to time and cost reduction of the overall product development cycle and proves further the intent and benefits of deploying PLM solutions within an organization.

Being committed to meeting common customers requirements, engineering teams of the two companies worked together to deliver numerous successful scenarios of data integration, suitable for customers' variant processes. The impressive results of the implementation studies performed for the Automotive and Aerospace Industry brought confidence in the market that critical bottlenecks in the simulation data management throughout the CAE processes can be eliminated while having ANSA interfacing with Teamcenter.

About Siemens PLM Software

Siemens PLM Software, a business unit of the Siemens Industry Automation Division, is a leading global provider of product lifecycle management (PLM) software and services with 5.5 million licensed seats and 51,000 customers worldwide. Headquartered in Plano, Texas, Siemens PLM Software's open enterprise solutions enable a world where organizations and their partners collaborate through Global Innovation Networks to deliver world-class products and services. About BETA CAE Systems S.A.

BETA CAE Systems S.A. is a private software and engineering company committed to the development of best-in-class CAE pre- and post-processing solutions for Finite Element Analysis applications.

BETA CAE Systems flagship products suite, comprised by ANSA pre-processor and μETA post-processor, due to its innovation and efficiency, holds a leading position in the CAE software market, worldwide. This product suite sets the standards in CAE pre- and post-processing in many sectors, including automotive, railway, aerospace, motorsports, chemical, electronics and academic.
