## BETA CAE Systems welcomes Advance Engineering as a new business partner in Russia

BETA CAE Systems is pleased to announce the agreement with ADVANCE ENGINEERING LLC to become our new business agent, in Russian Federation.

Following the remarkable growth of the company's software usage in Russia, this cooperation enhances BETA's presence in the region via a renowned partner. This cooperation aims to optimize the efficiency of the services to our clients in the region.

BETA CAE Systems is a leading provider of engineering simulation solutions, with global presence and activity. The company's software suite, which includes the engineers' favorite programs ANSA and META, holds a worldwide leading position across a range of industries, especially the Automotive, for the last 20 years.

ADVANCE ENGINEERING LLC is a Russian based engineering company focusing on projects spanning from design to prototype, specifically in aerospace, nuclear, and ground transportation industries. Drawing on the long experience and expertise, ADVANCE ENGINEERING deliver complete and comprehensive solutions for its customers, matching their project specific needs.

"We are excited to work with Advance Engineering, as this partnership will bring new potential to the growth of our business in Russia", says Sam Saliel, CCO of BETA CAE Systems. "We are confident that this partnership will benefit the users of our software suite in the region".

"The partnership with BETA CAE Systems is fully in line with our strategy and empowers our product offerings with a globally well-established simulation software suite" says Dmitry Maltsev, General Director of Advance Engineering. "We are looking forward to help our customers reach new engineering levels, by catching up on the latest cutting-edge engineering trends through employing BETA's simulation solutions".
