TISAX audit results are available for BETA CAE Systems S.A.

For BETA CAE Systems, confidentiality, availability, and integrity of information is of paramount importance, therefore, we take extensive measures and implement rigorous data and systems security policies for protecting confidential information. To achieve our objectives, we diligently observe the catalogue of the VDA ISA standard and the requirements of the TISAX framework for information security.

ENX TISAX® (Trusted Information Security Assessment Exchange), a registered trademark of ENX Association, is an information security framework, which allows independent vendors to assess and exchange information on their compliance to the requirements of the VDA ISA standard. TISAX, is governed by the ENX Association on behalf of the German Association of the Automotive Industry (VDA).

BETA is excited to share that had a TISAX audit, by an accredited TISAX audit provider, at the site of BETA CAE Systems SA, Greece. The TISAX Level 3 assessment results, which are not intended for the general public, are retrievable by registered organisations through the [ENX portal](#), under Scope ID: S1R9V4, Assessment ID: AC5C9L-2.
