

BETA CAE Systems and Volkswagen China: A Collaborative Success in Simulation Technology

China, May 11, 2024

BETA CAE Systems China and Volkswagen (China) Technology Co., Ltd. reunited for the second session of the "2024 Technology Exchange Workshop".

Engineers from our office in China, showcased the latest updates of the ANSA / META pre- and post- processors. They conducted in-depth demonstrations and provided solutions tailored to specific models, addressing the challenges faced by Volkswagen Technology engineers in batch processing and optimization. Particularly rewarding has been the interest shown by Volkswagen Technology engineers in BETA's solver series, including EPILYSIS, SPH, and FATIQ.

The workshop strengthened the collaboration efforts between the two organizations, aiming to enhance local Volkswagen model development with the aid of advanced simulation solutions. In this context, both teams will have the opportunity to conduct joint tests in the near future, with a particular focus on the calculation results and the rendering effects of the SPH solver which impressed with its performance and offered capabilities.

This event underscores our commitment to delivering comprehensive simulation solutions to support VW's increasing investments in the Chinese market.

About BETA CAE Systems

BETA CAE Systems transformed engineering simulation by introducing revolutionary process automation software tools and practices into Simulation and Analysis, more than 30 years ago. Committed to our mission to enable engineers to deliver results of high value, we continue to offer state-of-the-art, high-performance software and best-in-class services to the industry, around the world.
