

Autoliv China R&D Center and BETA CAE Systems China drive innovation in automotive safety

China, June 12, 2024

BETA CAE Systems China recently hosted a highly successful "2024 Technical Exchange Workshop" at the Autoliv China R&D Center. This event significantly strengthened the collaborative bonds between these two industry leaders, both dedicated to advancing automotive safety through state-of-the-art simulation technologies.

Autoliv's engineers shared their challenges in seat belt modeling, airbag simulation, and steering wheel design, for which the technical team of BETA provided solutions. The workshop also featured discussions on Machine Learning and Artificial Intelligence applications. Both parties explored the current trends in ML and AI, delving into the potential of their application in simulation data handling. Additionally, participants experienced VR/AR demonstrations, which offered a glimpse to the working ways of the nearing future.

Autoliv China invests significant effort into safety, solidifying its position as a leader in automotive safety R&D. We at BETA CAE Systems are honored by their trust and proud to support Autoliv in their mission by providing advanced simulation software and technical support.

About Autoliv China

Autoliv China leads in automotive safety innovation, developing advanced technologies to protect drivers and passengers worldwide. Their research and development efforts focus on integrating state-of-the-art safety systems that set industry standards, enhancing vehicle safety and promoting safer roads.

About BETA CAE Systems

BETA CAE Systems transformed engineering simulation by introducing revolutionary process automation software tools and practices into Simulation and Analysis, more than 30 years ago. Committed to our mission to enable engineers to deliver results of high value, we continue to offer state-of-the-art, high-performance software and best-in-class services to the industry, around the world.
