

BETA CAE Systems China and Envalior Hong Kong meet in the 2024 Technology Exchange Workshop

China, June 21, 2024

BETA CAE Systems China visited Envalior (Hong Kong) Co., Ltd., a leading company in the field of engineering materials, located on the banks of the beautiful Hong Kong River. Envalior engineers welcomed the BETA technical team, which was excited to meet with them, and especially with Mr. Tan, the simulation director, who has more than 20 years of experience with the ANSA pre-processor.

The session covered amongst other, the ANSA and META pre- and post-processors' newest capabilities and introduced the new FATIQ solver. Envalior engineers were particularly enthusiastic about the direct editing and optimization features, which they expect to greatly enhance their workflow efficiency. Following this workshop, Envalior engineers expressed their intention to proceed with ANSA training sessions to quickly implement new inspiring features.

Mr. Tan mentioned that while ANSA has many unique capabilities, only a small portion is implemented, leaving space for more exploration. BETA also offers a range of self-developed CAE simulation software and technical services that they are looking forward to utilizing. Envalior expressed their enthusiasm for these technical exchanges and looks forward to more communication with BETA, sharing experiences, and participating in BETA's activities.

We at BETA CAE Systems carry the expectations of numerous simulation users and are committed to the continual research and development. Our goal is to help users complete simulation tasks more effectively and introduce more innovations to the simulation industry.

About Envalior

Envalior is a leading innovator in engineering materials, known for its high-performance polymers, composites, and specialty materials. Committed to quality and sustainability, Envalior excels in research and development, delivering advanced solutions to meet the evolving needs of industries worldwide. With a customer-centric approach and global presence, Envalior is a trusted partner in driving technological progress.

About BETA CAE Systems

BETA CAE Systems transformed engineering simulation by introducing revolutionary process automation software tools and practices into Simulation and Analysis, more than 30 years ago. Committed to our mission to enable engineers to deliver results of high value, we continue to offer state-of-the-art, high-performance software and best-in-class services to the industry, around the world.
