

BETA CAE Systems visits Meridian-Mag to exchange technical insights

Shanghai, China, August 26, 2024

BETA CAE Systems China visited Shanghai Meridian Magnesium Products (Meridian-Mag), the magnesium alloy technology hub of Canada's Meridian Group in Shanghai. The visit aimed to deepen the technical cooperation between the two companies.

Director Wang of Meridian-Mag expressed his appreciation for the visit, sharing his positive impression from our software's capabilities. He highlighted that after attending last year's China Open Meeting, Meridian-Mag has increasingly adopted ANSA and META software for their processes. Especially META's advanced post-processing capabilities have become particularly valuable, as many of their OEM customers are now relying on META.

The visit concluded with a thorough presentation given by our expert engineers on various features and applications of META.

BETA CAE Systems China looks forward to continuing this fruitful collaboration with Meridian-Mag, contributing to the advancement of the Chinese automotive industry.
